## Corrigendum

## Corrigendum to “Performance evaluation of a co-production system of solar thermal power generation and seawater desalination” [Renew. Energy 169 (2021) 1121–1133]

Liyuan Yuan<sup>a</sup>, Qunzhi Zhu<sup>a,\*</sup>, Tao Zhang<sup>a</sup>, Rui Duan<sup>a</sup>, Haitao Zhu<sup>b</sup><sup>a</sup> College of Energy and Mechanical Engineering, Shanghai University of Electric Power, 2103# Pingliang Road, Yangpu District, Shanghai, 200090, PR China<sup>b</sup> College of Materials Science and Engineering, Qingdao University of Science and Technology, Qingdao, 266042, PR China

The authors regret that the literature review was not thorough enough and some relevant works were missed. The following citations shall be included.

- [1] P. Sharan, T. Neises, C. Turchi, Optimal feed flow sequence for multi-effect distillation system integrated with supercritical carbon dioxide Brayton cycle for seawater desalination, *Journal of Cleaner Production* 196 (2018) 889–901.
- [2] P. Sharan, T. Neises, C. Turchi, Thermal desalination via supercritical CO<sub>2</sub> Brayton cycle: Optimal system design and techno-economic analysis without reduction in cycle efficiency, *Applied Thermal Engineering* 152 (2019) 499–514.
- [3] P. Sharan et al., Cogeneration using multi-effect distillation and a solar-powered supercritical carbon dioxide Brayton cycle, *Desalination* 459 (2019) 20–33.
